

HI, I'M SHARDUL

DEVOPS ENGINEER, CLOUD
ENGINEER, DEVELOPER,
BLOGGER & ENJOY
CRAFTING SCALABLE
SYSTEMS.

RESUME

ABOUT ME

With 7 years of experience designing, deploying, and maintaining containerized applications in on-premises and air-gapped production environments. Deep expertise in Kubernetes orchestration — including HA multi-node cluster setup, RBAC, HPA, stateful application management, node affinity & pod scheduling, and ingress migration from NGINX to Traefik. Skilled in infrastructure automation, CI/CD pipelines, and operating distributed data systems including MongoDB, Cassandra, and Redis at scale.

SKILLS

- 01

TOOLS

Ansible, Git, Artifactory, Azure DevOps, Jenkins.
- 02

MESSAGING SYSTEMS

RabbitMQ, Kafka.
- 03

CONTAINERS & ORCHESTRATION

Kubernetes, Docker.
- 04

CLOUD PLATFORMS

AWS.
- 05

SCRIPTING LANGUAGES

Python, Bash.
- 06

MICROSERVICES

Apache Camel, Spring Boot.
- 07

DATABASES

MongoDB, Cassandra, Redis.
- 08

WEB SERVERS

HAProxy, NGINX
- 09

MONITORING & LOGGING

Nagios, Prometheus, Grafana, InfluxDB, Elasticsearch, Kibana, Loki.
- 10

OS & NETWORKING

Linux (RHEL, Ubuntu, CentOS), LVM.

EXPERIENCE

01

Sr. Executive - DevOps

NAV FUND SERVICES PVT. LTD.

Apr 2022 - Present

PROJECTS:

NAVFAS, NAVCRYPTO, NAVRTA, NAVTPS

Conducted quarterly DR drills with switchover in under 15 minutes failover, and led POCs for evaluating and onboarding new technologies into the stack. Architected and maintained CI/CD pipelines via Azure DevOps for containerized microservices deployments on both Kubernetes and Docker Swarm.

- Migrated production environments from Docker Swarm to Kubernetes.
- Migrated production environment from Single Node Kafka to Kafka Cluster.
- Managed MongoDB in production environment while also maintaining its replication in real time.
- Implemented monitoring, logging, and secure ingress across clusters.
- Successfully migrated CentOS 7 infrastructure to Oracle Linux 8 with zero downtime.
- Migrated production environment from Single Node Redis to Multi Node Redis Stack Cluster.

02

DevOps Engineer

Keen & Able Computers Pvt. Ltd.

Jan 2019 - Apr 2022

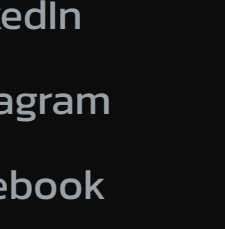

PROJECTS:

Fino Payment Bank, TAHAL, Kanpur Smart City

While working with multiple clients I gained hands-on experience from developing frontend to middleware to backend applications.

- Automated infrastructure tasks using Ansible and shell scripting; managed CI/CD using Jenkins and GitLab.
- Configured and maintained artifact repositories using Artifactory.
- Developed and deployed microservices; handled troubleshooting and root cause analysis.
- Managed service deployments and monitoring in JBoss Fuse environments.
- Integrated SonarQube for code quality checks and used JMeter for performance testing.
- Administered HAProxy for traffic load balancing.
- Configured messaging queues in ActiveMQ.
